University Prep Program The High School Advantage

Dear Parent:

Want your son or daughter to go to a good University after High School?

Do you find your child struggling in High School after grade 8?

Do you find yourself struggling at the end of a rough day when your child asks for help with the Math homework?

You are not alone if you have answered YES to any of the above questions. Supplementary education and extra help will improve your child's grades and help make the cut for the college / university of choice.

Help your child realize his / her potential. Students who score good marks tend to enjoy school and look forward to higher studies and a good career.

At the Academy of Learning, grade 9 – 12 students get the extra help they need to understand difficult concepts, solve difficult problems and do well on their exams.

In these days of extreme competition, give your child a competitive edge.

Raise the motivation and confidence level of your child with quick & visible results. Students learn TWO things at the **Academy of Learning**:

1. How to improve their High School grades & performance
2. How to sustain the High Performance levels beyond grade 12

Start Now - Call us for details. An early start will help build a firm foundation for your child's future.

Sincerely,

Sunita Joshi
